

Listing of Claims:

1. (Canceled)

2. (Previously Amended) The dispenser (20) as claimed in Claim 8 comprising a second box (25) in said lid (22), said second box (25) comprising an elongated opening (60) lid compartment (25) for dispensing a second type of towelettes (34), said inner box (26) and said second box (25) occupying, in a superposed position, a space allowing for a closed position of said lid.

3. (Original) The dispenser (20) as claimed in Claim 2 of which said second box is removable.

4. (Canceled)

5. (Canceled)

6. (Canceled)

7. (Canceled)

8. (Previously Amended) A dispenser comprising: a container and a lid attached to said container; a removable inner

box inverted in said container and defining a compartment for holding a stack of towelettes, said inner box having a bottom and a serrated opening made in said bottom for the removal of said towelettes, a watertight means of attaching said container and said lid in a closed position, the opening of said lid and the passage of said towelettes through said serrated opening making it possible to use towelettes kept in a controlled environment by pulling them, said removable inner box designed to make possible a single loading of said stacks of said towelettes and a means of sealing said removable inner box in place, the top of said inner box being sealed against the bottom of said container.

9. (Original) The dispenser as claimed in Claim 8 in which said means of sealing comprise the use of a microwave oven which makes possible the fusion of said top against said bottom.

10. (Previously Amended) The dispenser as claimed in Claim 8 in which a reversible cartridge of a lesser thickness than the thickness of said lid is designed to be placed on either side in said lid.

11. Canceled

12. Canceled

13. (Previously Added) A dispenser comprising: a container and a lid attached to said container; a removable inner box inverted in said container and defining a first compartment for holding a stack of moist towelettes and a second compartment for holding a stack of dry towelettes, said inner box having a bottom and a first opening made in said bottom for the removal of said moist towelettes and a second opening made in said bottom for the removal of said dry towelettes, a watertight means of attaching said container and said lid in a closed position, the opening of said lid and the passage of said towelettes through said first and second openings making it possible to use said towelettes kept in a controlled environment by pulling them through each said opening.
